### Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for Distillates (Petroleum) Hydrotreated Light, prepared by Militex Coatings Inc. and dated December 19<sup>th</sup>, 2013.

### Statement of Intent

Militex Coatings is committed to demonstrating the highest standards of environmental management and employee safety. Distillates (Petroleum) Hydrotreated Light is being used by Militex in their processes. Whenever feasible they plan to eliminate or reduce the use, creation and discharge of substance in full compliance with all Federal and Provincial Regulations.

### Reduction Objectives

Our goal is to continue to investigate ways to reduce the use of Distillates (Petroleum) Hydrotreated Light at our facility in the future.

**Description of Substance**

Distillates (Petroleum) Hydrotreated Light is an ingredient found in the primer and products used in the Paint Line at the facility.

**Toxic Substance Reduction Option to be Implemented**

Due to the fact that their customer mandates specific material compositions to meet customer performance specifications, it is difficult for the company to commit to any of the other Options that were presented throughout this plan. However the following Option will be implemented:

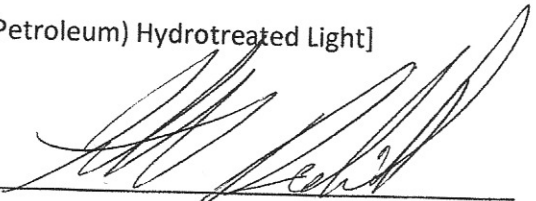

**Option 3** - Additional training and repeat training in the cleaning operation of the paint lines and spray guns so as to ensure that waste and release of emissions is minimized.

The company will also continue to strive toward seeking possible reduction options in the future.

Certification by Highest Ranking Employee

As of December 19<sup>th</sup> 2013, I, Andre Maas certify that I have read the toxic substance reduction plan for the toxic substance referred to below and am familiar with its contents and to my knowledge the plan is factually accurate and complies with the Toxic Reductions Act, 2009 and Ontario Regulation 455/09 (General) made under that Act.
