## Plan Summary Statement

This plan summary accurately reflects the content of the toxic substance reduction plan for n-Butyl Acetate, prepared by MiliteX Coatings Inc. and dated December 31, 2015.

## Statement of Intent

MiliteX Coatings is committed to demonstrating the highest standards of environmental management and employee safety. N-Butyl Acetate is being used by MiliteX in their processes. Whenever feasible they plan to eliminate or reduce the use, creation and discharge of the substance in full compliance with all Federal and Provincial Regulations.

## Reduction Objectives

Our goal is to continue to investigate ways to reduce the use of N-Butyl Acetate at our facility in the future.

**Description of Substance**

N-Butyl Acetate is an ingredient found in the coating products used in the Paint Line at the facility.

**Toxic Substance Reduction Option to be Implemented**

Due to the fact that their customer mandates specific material compositions to meet customer performance specifications, it is difficult for the company to commit to any of the other Options that were presented throughout this plan. However the following Option will be implemented:

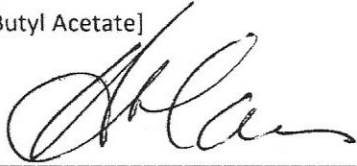

**Option 4** - Additional training and repeat training in the use of the substance so as to ensure that waste and release of emissions is minimized.

The company will also continue to strive toward seeking possible reduction options in the future.
